CAREER OBJECTIVE

Motivated Computer Science fresher. Equipped with hands-on project experience in Django, Flask, HTML5, CSS, JavaScript, and MySQL. Eager to join a development team where I can apply my academic knowledge and project skills to build real-world web applications and grow as a professional developer.

INTERSHIPS & TRAINING

Python Full Stack Trainee

Qspiders Training Institute | Mar 2026 – Present

- Building end-to-end web apps using Django with REST APIs, user authentication, session handling, and Oracle SQL integration.
- Developing responsive frontend layouts with HTML5, CSS3, and JavaScript including dynamic DOM updates.

Python Full Stack Developer Intern

Edu Skills Academy | Jul 2025 – Sep 2025

- Built a Flask/Django web app with user authentication and full CRUD operations using MySQL, reducing page data load time by 20% through optimized SQL queries.
- Integrated RESTful APIs between Python backend and JavaScript frontend for dynamic data rendering without full-page reloads.

Web Full Stack Developer Intern

Edu Skills Academy | Apr 2025 – Jun 2025

- Developed 3+ responsive web pages with mobile-first layouts using HTML5, CSS Flexbox, and vanilla JavaScript, reducing layout breakage across screen sizes.
- Implemented a client-side form validation module in JavaScript that reduced invalid submissions by 40% during user testing.
- Debugged and resolved 10+ UI inconsistencies across Chrome and Firefox, improving cross-browser compatibility of the delivered application.

PROJECTS

Intelligent Architecture for Detecting Persistent Attacks in Enterprise Networks (Final Year Project)

GitHub: <https://github.com/RekhapalliUmaSatyaSantosh/Intelligent-architecture-for-detecting-APTs>

- Built an APT detection web application using **Django** and **Scikit-learn**, implementing Random Forest, SVM, KNN, and XGBoost models trained on the DARPA intrusion detection dataset.
- Designed a multi-algorithm comparison dashboard that visualized model accuracy using Matplotlib, enabling side-by-side performance evaluation of 4 ML classifiers.
- Established a security incident response framework reducing simulated attack detection and containment time by 50%.

Calculator Web Application

- Designed and deployed a browser-based calculator with a Python (Flask) backend handling server-side computation, connected via REST API to a JavaScript frontend — demonstrating full-stack request-response flow.

SKILLS

Languages: Python, C, JavaScript

Frontend: HTML5, CSS3

Database: OracleSql, MySql

Tools&Platforms: VSCode, GitHub, Git

Core Concepts: OOPs, Exception Handling, Data Structures, DBMS

EDUCATION

Bachelor of Technology (B. Tech) – Computer Science and Engineering

Eluru College of Engineering and Technology | 2022 – 2026

CGPA: 7.65

CERTIFICATIONS

- Python Programming – IBM
- Python Essentials – Cisco Networking Academy
- Oracle Cloud Infrastructure 2025 – Oracle

ACHIEVEMENTS & ACTIVITIES

- Practiced 300+ Oracle SQL queries covering Joins, Subqueries, Aggregate functions, and report generation—demonstrating strong database proficiency.
- Solved 200+ Python Programming challenges focused on built-in data structures, OOPs, and Exception handling on coding platforms. Built multiple mini-projects using Python modules and Sql.
